

## Corporate Health & Safety Policy

Tiwest is a fully integrated mining, minerals processing and titanium dioxide pigment manufacturing organisation that supplies a range of products to customers domestically and overseas.

The Tiwest Joint Venture Participants and Tiwest Management accept that all Tiwest employees, all associated contractors and visitors, our customers, suppliers and the communities in which we operate, have a right to expect prudent and responsible health and safety performance from our activities.

To meet this expectation Tiwest will:

- Fulfil, as a minimum, all statutory health and safety requirements and company policies;
- Develop, educate and endeavour that all employees and contractors understand and are accountable in achieving the ultimate aim of eliminating accidents and safety incidents;
- Identify health and safety risks and establish related improvement targets, with the ultimate aim of eliminating workplace injury/illness across the organisation;
- At each operational site, prepare complementary improvement action plans, based on the Tiwest Business Plan;
- Monitor and maintain Safety Performance Standards including implementing systems to investigate and analyse health and safety incidents;
- Review, audit and evaluate the health and safety performance of company operations and seek opportunities for improvements;
- Provide adequate resources and training to maintain and improve health and safety performance; and
- Provide safety leadership with the aim of open and effective communication with all stakeholders and share health and safety expertise with others to help improve industry performance.
